1) OVERVIEW:

- a) Memory matching is a matching game where players flip over cards to find matching pairs. The game offers multiple levels to choose from as well as the option to change the size of the game and the different categories,

2) QUICKSTART

- a) Type www.memorymatching.com into your browser.
- b) From there the game is plug and play and is ready to go. Just start clicking cards trying to get a match. Once two cards have been clicked, either you get a match and the cards disappear, or the game continues to display the card until you click on your next card. Match all the cards clearing the board to win the level.

3) SYSTEM REQUIREMENTS:

- a) Memory Matching is designed to be accessed anywhere online. All you need is:
 - i) Device: phone, computer, tablet
 - ii) Browser: chrome, edge, safari
 - iii) Internet

4) HOW TO PLAY

- a) Choose a card that is face down, click on any other card to reveal its image
- b) If the two cards match they will reveal both and disappear
- c) If they are not a matching pair, they will stay revealed until a new card is chosen to reveal
- d) You cannot click a card that you just revealed immediately
- e) Repeat to find matching pairs
- f) Profit

5) FEATURES AND FUNCTIONS

- a) Change number of cards/grid size:
 - i) To change to the size of the game board(number of guessing cards) on mobile in the bottom right click size. Upon clicking several options for game size will appear clicking on rod these options will reset the current game and change the board size.
- b) Restart game
 - ii) To restart the game click restart button in bottom left on mobile

6) Troubleshooting

- a) Reload the page if anything seems wrong.
